REGULA CIRC

This is the foil that literally raises the bar in the coldform sector once again.
REGULA CIRC is designed for circular economy.

Benefits at a glance:

- Ultimate protection against moisture, oxygen, light, and gas
- PVC-free
- Higher recovery rate for aluminum recycling
- Excellent delamination resistance and deep drawing capacity

The 100% barrier. Designed for recycling.

What is REGULA CIRC?

If you want the ultimate in product protection, then REGULA is the solution for you.

REGULA CIRC maintains all excellent properties of the established solution for total barrier blister packs provided by REGULA. REGULA CIRC is optimized for the circular economy by a couple of measures:

- Replacing PVC by polyethylene in the sealing layer
- Reducing plastic content
- Increased aluminum content

REGULA CIRC is a total barrier solution for blisters. It complies with future regulation and legislation for sustainable packaging.

Why use REGULA CIRC?

REGULA CIRC does not contain any PVC and uses less plastic material vs. the standard product. Its modular architecture allows to meet various product requirements.

The reduced plastic content results in less CO2 emissions in the recycling process and enables better sorting as well as improved medicine shelf life.

Moreover, it has an equal or even better machine performance. It can be perfectly dropped into existing machines and does not require any CAPEX to modify packaging lines.

Used in combination with a tailored NORMA lidding foil, REGULA CIRC ensures blister packaging with optimal barrier protection and patient experience.

Ready to face any challenge.

Where to use it?

This packaging solution is suitable for pharmaceutical products that need the highest protection against moisture, oxygen, other gases, and light.

It is a replacement option for high barrier thermoformed blisters when compliance with future regulation and legislation with respect to primary packaging materials is required.

What should first-time users know?

Constantia Flexibles offers personalized service for first-time users of REGULA CIRC, ensuring close collaboration with clients until production is running smoothly and as designed. Our product development and application team provides a unique "Live Stress Check" service and will help you find the right solution for your needs. The sky's the limit: we can easily custom color or print REGULA CIRC laminate, combine it with overt or covert security features.

If you are interested in a custom solution, we will give your request our undivided attention. After all, it might be the first step towards a pioneering new product, like LUBRICA. This unique laminate was the result of R&D efforts to create a custom solution with the highest degree of formability and a sealing layer with advanced anti-stick properties.

And the specifications?

oPA 25 µm – Al 47 µm – PE 25 µm

oPA 25 µm – Al 60 µm – PE 25 µm

oPA 25 µm – Al 80 µm – PE 25 µm

Options using PP as sealing and contact layer are available upon request.
