## Covers Carriers Cases SECURA

The key features of this sustainable packaging are its protective barrier properties, which is why we call it "SECURA", Latin for "safe" or "protected".

# The aluminum container for optimal protection.

### What is SECURA?

Driving innovation and solutions that help save lives: with this as our main motivation, Constantia Flexibles set out to develop a fundamentally new pharmaceutical packaging concept. The basic idea was to provide optimal protection, even for products that are shipped around the globe. Throughout the development process, our R&D team relied on its extensive expertise in aluminum as a material and in processing to deliver outstanding results. Our SECURA aluminum container system has become one of the best packaging options on the market for sensitive medical devices.

### Why use SECURA?

In today's global medical device market, providing optimal protection during shipping poses a considerable challenge. It is vital to protect these valuable devices from mechanical and environmental influences in transit. SECURA delivers deep-drawn containers manufactured from an aluminum PP laminate and a convenient peelable lidding foil for easy opening. Its superior barrier properties protect against water vapor and oxygen regardless of the climate zone, while a range of additional features is designed to meet demanding protection and regulatory requirements for quality, hygiene, etc. The extremely high-integrity seal provided with SECURA is also very attractive, and its high-quality packaging design enables market and product differentiation.

## **Customer-friendly and customizable.**

#### Where to use it?

This packaging solution is suitable for:

- new healthcare products with demanding requirements (GMP standards).
- medical devices according to IEC (International Electrotechnical Commission) standard 60529.

### What should first-time users know?

Constantia Flexibles offers personalized service for first-time users of SECURA, ensuring close collaboration with clients until production is running smoothly and as designed. Contact our team with your exact specifications and let them adapt the design and format of SECURA to your individual needs. Whether it is ribs to secure a product during shipping or various design elements, rest assured SECURA will deliver optimal protection and shelf appeal for your medical devices.

### And the specifications?

SECURA front and open

Example of SECURA application in inhalation (adding a desiccant pouch is possible)
